<b>Office Action Summary</b>	<b>Application No.</b> 10/574,873	<b>Applicant(s)</b> OLSSON ET AL.	
	<b>Examiner</b> /Steven O. Douglas/	<b>Art Unit</b> 3771	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 02 December 2009.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION*****Election/Restrictions***

Applicant's election without traverse of Group I. (claims 1-9 and 11-15) in the reply filed on 12/02/09 is acknowledged. Accordingly, claim 10 has been withdrawn from further consideration by Examiner.

***Drawings***

The drawings are objected to because Figure 1 contains box representation of elements that are merely labeled or indicated by element numbers, and Figure 2 contains written matter that should be indicated by alpha numeric representation, all of which are improper. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and

Art Unit: 3771

informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

Claims 1-9 and 11-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regard to claim 1, Applicant's use of alternative language (i.e. "optionally") on line 2 renders the claim indefinite since the metes and bounds of the claim cannot be readily ascertained.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,6-9 and 11-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Garrill et al. (US 6,390,291).

The Garrill et al. reference discloses a MDI packaging system and method comprising a MDI 36 that is filled with both a propellant and a powder medicament or active ingredient (see col. 5, line 42 through col. 6, line 11) and packaged in a container 20 that is exposed to a vacuum prior to the sealing/closing thereof.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Garrill et al.

The Garrill et al. reference discloses a system and method (*supra*), but fails to disclose the vacuum as being less than 100 mbar or 200 mbar. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have the vacuum be less than 100 mbar (claim 4) or less than 200 mbar (claim 3), since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Garrill et al. in view of Wetterlin (US 4,524,769).

The Garrill et al. reference discloses a system and method (*supra*), but fails to disclose the inhaler as being a Turbuhaler. The Wetterlin reference discloses another inhaler apparatus that is considered a Turbuhaler-type inhaler apparatus (see Figure 1). It would have been obvious to one of ordinary skill in the art at the time the invention was made to substitute a Turbuhaler as, for example, shown by Wetterlin, for the MDI of Garrill et al. wherein so doing would amount to

Art Unit: 3771

the mere substitution of one type of inhaler apparatus for another that would work equally as well.
